

## PATCHCOTE LIME PLASTER REPAIR KIT 2KG

### OVERVIEW

Patchcote is a plaster repair kit for internal and external use.

Perfect for small repairs to Lime Plaster and any pre 1920's building for anyone wishing to use a low-carbon, sustainable product rather than a modern filler.

### PRODUCT DESCRIPTION

Based on an Elizabethan plaster mix, a non-hydraulic lime plaster that can be used on practically any background at virtually any depth and can be used internally or externally.

Designed to be simple to use by anyone.

This is a dry mix which you just add water to.

With a long life once mixed.

Handy size tub with handle for ease.

### TECHNICAL

Fill tub with clean water @ 600ml, gently add the powder to the water and mix thoroughly, a standard dinner fork will do the job!

Add fibres for final mix.

Ensure the area to be filled is clean and free from loose, dusty material.

Lightly damp down the area to be filled.

Push product onto place and smooth with a filler knife, pointing trowel or plastering trowel.

Patchcote can be applied at any depth from 2mm to 75mm and beyond in one pass.

Once mixed, any leftover Patchcote can be kept in the tub, as long as the lid remains closed it will remain wet and ready to go for up to a year.

### SAFETY

**Caution: Calcium Hydroxide is an IRRITANT.**

- Causes serious eye damage
- Causes skin irritation
- May cause respiratory irritation
- Keep out of reach of children
- Wear protective gloves, eye and face protection
- If in eyes, rinse cautiously with water for several minutes and immediately call for medical advice
- If on skin, wash with plenty of soap and water
