

Lime Plaster Filler 5KG

OVERVIEW

For Internal or External use

Based on an Elizabethan plaster recipe, a non-hydraulic lime filler that can be used on practically any background at virtually any depth.

Fine Fill is perfect for small repairs on any pre 1920's building or for anyone wishing to use a low-carbon, sustainable product rather than a modern filler.

PRODUCT DESCRIPTION

Based on an Elizabethan plaster mix, a non hydraulic lime plaster that has been sieved, Fine Lime is designed for repairs of cracks and knocks/damage, and any imperfections that need addressing.

TECHNICAL

Fill a tub with 1.5l Water, gently add the powder to the water and mix thoroughly. Ensure that the area to be filled is clean and free from loose, dusty material. Lightly damp down the area to be filled.

Push filler into place and smooth with a filler knife, pointing trowel or plastering trowel.

Fine fill can be used at any depth.

Once mixed, any leftover Fine Fill can be kept in the tub, as long as its airtight, it will remain useable for up to a year at least.

SAFETY

Calcium Hydroxide is an IRRITANT.

- Causes serious eye damage.
- Causes skin irritation.
- May cause respiratory irritation.
- Keep out of reach of children.
- Wear protective gloves, eye, and face protection.
- If in eyes, rinse cautiously with water for several minutes and immediately call for medical advice.
- If on skin, wash with plenty of soap and water.
- Avoid breathing dust. If inhaled, remove the affected individual to fresh air and keep at rest in a position comfortable for breathing.
